

## **Occupational profiles and EOPPEP: A review and the way ahead**

Nikos Georgiadis, PhD, Scientific Advisor to the Governing Board of EOPPEP

Occupational profiles are the linkage of Labour Market and Education/Training. EOPPEP has amongst other things the mandate to accredit occupational profiles, what in other countries is called occupational standards. The presentation deals with the historical review, necessities and other facts that lead to the production and accreditation of occupational profiles and also their development and acknowledgements for the current legal and operational reality concerning Greek VET. Its worth mentioning that occupational profiles are not a legal obligation in tertiary education hence the presentation deals with EQF levels below 6.

The methodology and other facts concerning the development and accreditation of profiles shall be presented here alongside with the legal framework.. Also a critical review, evaluation will be attempted here and the future programming shall be outlined. Some of the positions that will be expressed here are views of the writer/presenter and not of the organization represented.
