## Training of cultural mediators utilizing new Social Networking Software

[www.sonetor-project.eu](http://www.sonetor-project.eu)

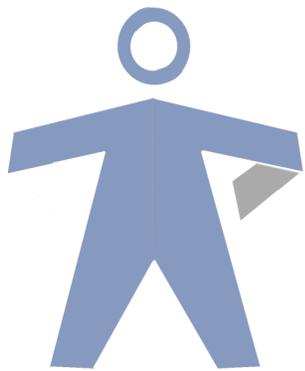

LEONARDO DA VINCI Multilateral Projects for Development of innovation

February 2012 — January 2014

## About the project

Over the past decades, internal and external migration has been considerably growing in the European Union transforming European nations into multi-cultural societies. Thus, a pressing need to assist foreign citizens in smoothly becoming members of the hosting societies has emerged; at the same time, hosting societies must be coached into learning to battle xenophobia and tolerate different cultures. Such assistance and coaching are provided by Cultural Mediators, the role of whom is being increasingly appreciated by European societies. Although various VET courses and educational programmes are available, no systematic effort has been made to design and offer sustainable services that address the actual Cultural Mediators needs arising in the workplace.

„SONETOR -Training of cultural mediators utilizing new Social Networking Software” is a Development of Innovation LLP Multilateral project co-funded under the LifeLong Learning Programme – Leonardo da Vinci (2012).

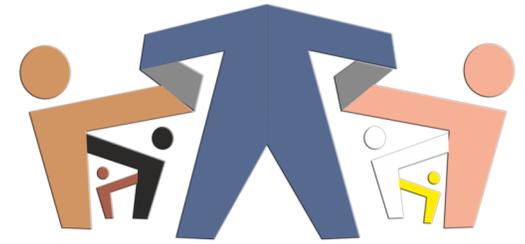

## Project results

The project will review the professional needs of cultural mediators and from this develop a draft job profile, detailing the knowledge, skills and competencies required to undertake the role. It will further examine how these might be acquired through formal educational programmes and the recognition of the learning gained through experience and other informal methods.

The project will develop a training platform into which existing social networking applications, modern adult education methodologies and specifically designed content and services will be integrated to assist those working in the field of cultural mediation to identify and articulate the knowledge, skills and competencies necessary to

# SONETOR

function in a professional manner. It will also assist them to describe how these can be acquired through formal and non-formal learning.

A variety of workshops in the partner countries in Austria, Greece, Ireland, Poland and Spain will support this process.

Furthermore, a European community of Cultural Mediators will be formed, ensuring the sustainability of project outcomes.

If you are interested in joining the social networking or real life-like training scenarios, please contact the project coordinator or the project partner closest to you.
